PROFESSIONAL SUMMARY

Product Analyst at Snapdeal (AceVector Group) working on customer retention, return-to-origin (RTO) and fraud-risk reduction, and customer experience analytics, and product lead for the integration of AI-powered IVR calling. Hands-on with customer cohort design, campaign experimentation, KPI tracking and reporting automation using SQL, Python and Databricks. Works cross-functionally with product, technology, customer experience and operations teams. B.E. Computer Science and Engineering graduate, CGPA 9.07

PROFESSIONAL EXPERIENCE

Product Analyst | Snapdeal (AceVector Group) **March 2026 – Present**

- **Influencer Management Platform:** Driving end-to-end development of an in-house influencer management platform covering onboarding, business operations, finance, and budget management to improve workflow traceability and reduce reliance on email-based coordination.
- **Customer Retention & WhatsApp Experiments:** Evaluated WhatsApp-based customer experiments, with CVR increasing from **3.0% to 4.5% (+1.5% points; +50% relative uplift)**, at an estimated cost of **₹25–₹30** cost per transaction**.**
- **AI-Powered IVR & Win-Back:** Designed customer targeting cohorts and coordinated integration planning for automated IVR workflows focused on abandoned-cart recovery and customer win-back, with a target of **2,000+ orders per day.**
- **NDR & RTO Optimization:** Analyzing non-delivery report (NDR) rescheduling workflows and conducting operational experiments, contributing to a reported **1.2% impact on RTO performance**.
- **AI Chatbot Optimization:** Analyzing in-app chatbot performance and customer support journeys to identify friction points, contributing to an increase in CSAT from **45.3% to 67% month-to-date.**
- **SHIELD Integration & RTO Risk Mitigation**: Analyzed device-level SHIELD risk signals across **1.4M IDs, identifying 9,864 flagged IDs (approximately 0.70%)** to support targeted interventions for RTO risk mitigation.
- **Reporting Automation:** Automated recurring reporting workflows across customer experience (CX), chatbot performance, refunds, and RTO, reducing manual reporting effort and improving KPI monitoring consistency.

SKILLS SUMMARY

Programming & Querying:	Python, SQL, Java
Analytics Libraries:	Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn
Tools & Databases:	Power BI, DataBricks, Excel, Notion, Tableau, MySQL, Git-GitHub
Business and Domain:	Cohort Analysis, Campaign Experimentation, KPI Tracking and Reporting, Root-Cause Analysis, Customer Retention and Fraud-Risk Analytics,

EDUCATION

B.E. Computer Science and Engineering | Chitkara University, Punjab, India **August 2023 - Present**

CGPA: 9.07/10

PROJECTS

CodeReview.ai | AI-Powered Code Review Platform | Project Link

- Built a full-stack web application that analyzes submitted source code and returns instant AI-generated feedback on logical errors, code quality issues and deviations from programming best practices.
- Added AI-powered suggestions for performance optimization and security vulnerability detection to help developers improve code readability, maintainability and development efficiency.

CERTIFICATIONS

Python Foundation Certification, **Infosys** | Introduction to Data Management, **Meta** | Blockchain foundation in Business and Financial Services, **INSEAD** | Data Analytics Bootcamp, **Udemy** | Data Analysis with Spreadsheets and SQL, **Meta** | Power BI visualization with AI, **Office Master**

LEADERSHIP EXPERIENCE

Chairperson | WIE IEEE-CIET Affinity Group **June 2025 – Aug 2026**

- Led **10+ technical and professional events,** coordinating **15–20 volunteers** and contributing to a reported **25% increase in participant engagement.**
- Organized mentorship and skill-development workshops for **200+ students**, supporting technical learning and professional development.

AWARDS

IEEE Delhi Section **Outstanding Student Volunteer Award 2026** | Winner, **DICE TECHNOVISION 2.0 2025**| Winner, **SCIENCE CARNIVAL 2024** | **Excellence Award 2023** – Amar Ujala
